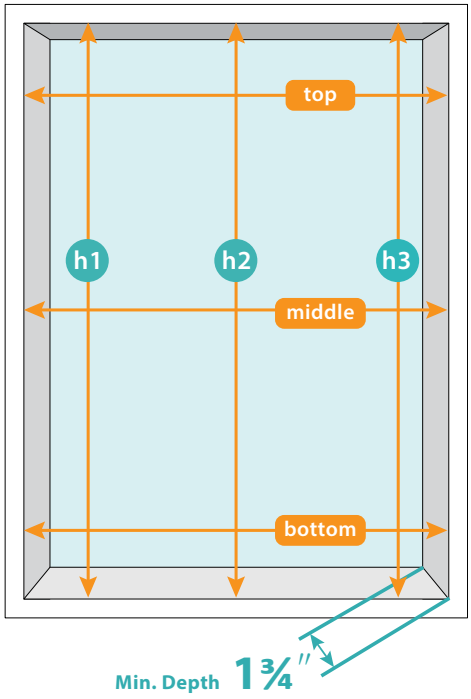
Measurement Guide



INSIDE MOUNT

- Width:

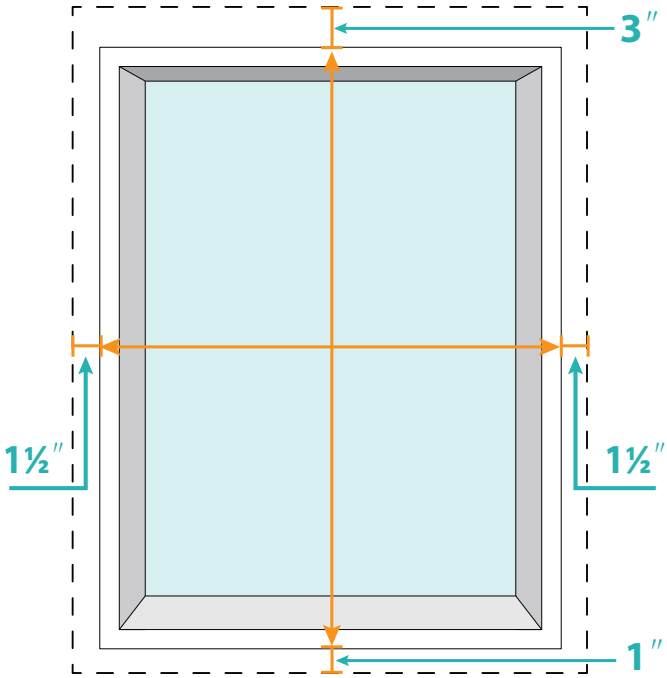
  Step 1: Measure the width at the top, middle, and bottom inside of your window opening. Use the **smallest** measurement.

  Step 2: **Subtract ¼** inch from that number.

  Step 3: Round **down to the nearest size** when ordering.

- Height: **Largest** of inside framed height (h1, h2, h3). Choose the height that matches or exceeds the window length.

- Depth: **1¾″** required. Ensure no obstacles.



OUTSIDE MOUNT

- Width: Include window trim and **add 1½″ on each side**. Round up the nearest width when ordering.
- Height: Include window trim and **add 3″ on top, 1″ on the bottom**. Choose the height that matches or exceeds the window length.
- Minimum 3″ flat surface above the window required.

The blind width ordered is the actual width
(no width deductions taken).
