Woven

Structured Texture
Timeless Design

Structured Woven Construction
Interlaced yarns create a defined, stable structure with a refined textile appearance suitable for versatile home applications.

Rich Pattern Possibilities
Woven construction supports diverse patterns and textures, offering flexible decorative options for classic and modern collections.

Balanced Durability & Comfort
Structural stability and everyday comfort combine to support durable, versatile products for residential and lifestyle collections.

Timeless Decorative Appeal
Refined woven texture suits throws and accent pieces designed for both classic and contemporary interior environments.

Care Instructions

Machine Wash
Gentle Cycle: Wash in cold water on a gentle cycle when permitted by the care label.

Low Heat Drying
Use low heat or the recommended drying method.

Do Not Bleach
Avoid bleach to help maintain fabric appearance.

Handle with Care
Avoid snagging or excessive pulling on woven yarns.

Care Tips
Wash with similar colors and avoid contact with sharp objects that may catch the woven surface. Always follow the product care label.

Decor Pillow

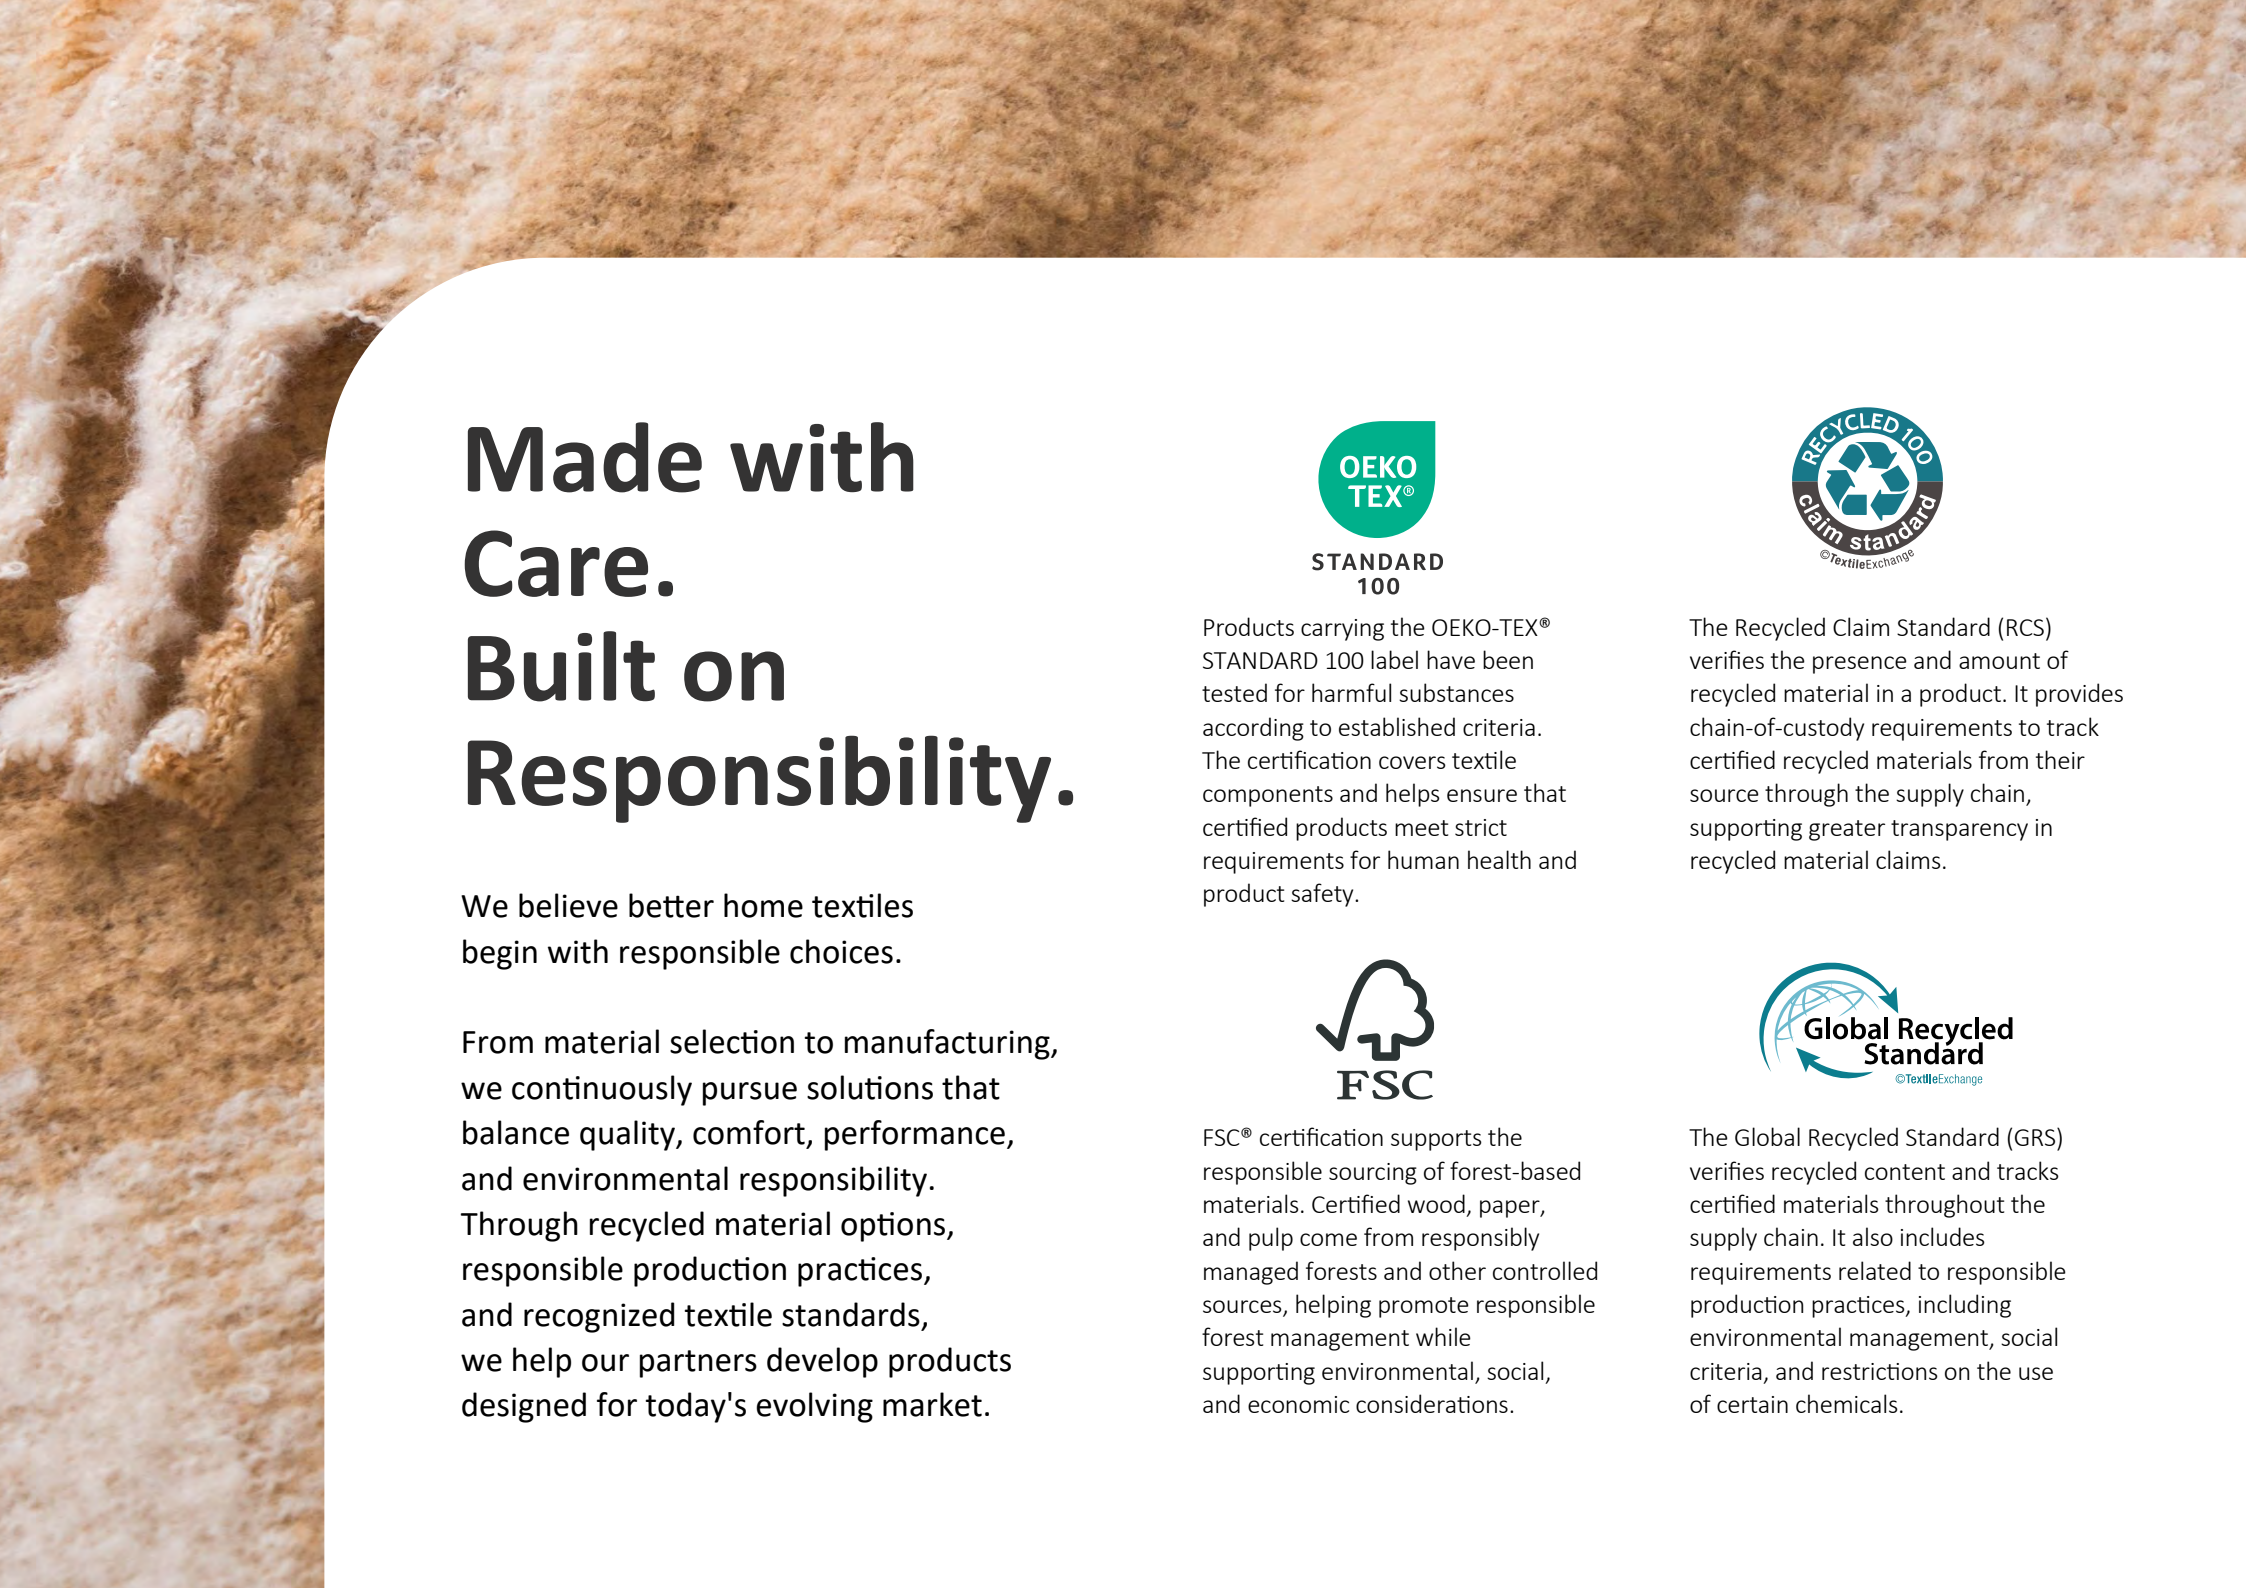
Model No. DP7A

Woven Décor Pillow

Fabric Composition 100% Acrylic or 100%Polyester ; Acrylic / Polyester

Fabric Weight (GSM) Varies by yarn type or size.

18"x18"



Made with Care. Built on Responsibility.

We believe better home textiles begin with responsible choices.

From material selection to manufacturing, we continuously pursue solutions that balance quality, comfort, performance, and environmental responsibility. Through recycled material options, responsible production practices, and recognized textile standards, we help our partners develop products designed for today's evolving market.

OEKO-TEX® STANDARD 100

Products carrying the OEKO-TEX® STANDARD 100 label have been tested for harmful substances according to established criteria. The certification covers textile components and helps ensure that certified products meet strict requirements for human health and product safety.

RECYCLED 100 claim standard ©TextileExchange

The Recycled Claim Standard (RCS) verifies the presence and amount of recycled material in a product. It provides chain-of-custody requirements to track certified recycled materials from their source through the supply chain, supporting greater transparency in recycled material claims.

FSC

FSC® certification supports the responsible sourcing of forest-based materials. Certified wood, paper, and pulp come from responsibly managed forests and other controlled sources, helping promote responsible forest management while supporting environmental, social, and economic considerations.

Global Recycled Standard ©TextileExchange

The Global Recycled Standard (GRS) verifies recycled content and tracks certified materials throughout the supply chain. It also includes requirements related to responsible production practices, including environmental management, social criteria, and restrictions on the use of certain chemicals.
