Velvet

Luxurious Softness
Elegant Shine

Luxurious Natural Sheen
High-density short pile with a smooth, even surface that reflects light beautifully, showcasing a natural soft sheen and enhancing the sense of warmth and elegance in any space

High GSM for Versatile Comfort (180–350 GSM)
Adjustable from lightweight (180 GSM) for robes and decorative pillows to heavyweight (300–350 GSM) for throw blankets, offering ideal thickness and breath ability across all seasons.

Strong Design Adaptability
Ideal for solid colors, prints, stripes, and embossed (Bubble) designs, bringing out 3D texture and visual depth through advanced velvet weaving technology.

Perfect for Home & Lifestyle
Premium velvet enhances the look and feel of any home textile product, delivering cozy comfort and sophisticated style.

Care Instructions

Machine Wash-Gentle & Protective
Wash in cold water at or below 30°C
with a gentle cycle.

Low Heat Tumble Dry
Tumble dry on low heat.
Remove promptly to minimize wrinkles.

Machine Wash-Gentle & Protective
Avoid using bleach or fabric softeners.

Machine Wash-Gentle & Protective
Do not iron the velvet fabric.
Heat may crush the pile and alter the texture.

Care Tips
For best results, wash separately on the first use. Always follow the care label instructions on the product.

Small / Medium / Large

Made with Care. Built on Responsibility.

We believe better home textiles begin with responsible choices.

From material selection to manufacturing, we continuously pursue solutions that balance quality, comfort, performance, and environmental responsibility. Through recycled material options, responsible production practices, and recognized textile standards, we help our partners develop products designed for today's evolving market.

OEKO-TEX® STANDARD 100

Products carrying the OEKO-TEX® STANDARD 100 label have been tested for harmful substances according to established criteria. The certification covers textile components and helps ensure that certified products meet strict requirements for human health and product safety.

Recycled Claim Standard

The Recycled Claim Standard (RCS) verifies the presence and amount of recycled material in a product. It provides chain-of-custody requirements to track certified recycled materials from their source through the supply chain, supporting greater transparency in recycled material claims.

FSC

FSC® certification supports the responsible sourcing of forest-based materials. Certified wood, paper, and pulp come from responsibly managed forests and other controlled sources, helping promote responsible forest management while supporting environmental, social, and economic considerations.

Global Recycled Standard

The Global Recycled Standard (GRS) verifies recycled content and tracks certified materials throughout the supply chain. It also includes requirements related to responsible production practices, including environmental management, social criteria, and restrictions on the use of certain chemicals.
